

In a group or by yourself, use google to investigate the role of each of the following individuals or groups of individuals in developing an understanding of the structure and behavior of membranes and the interactions of lipids (oils) and water:

How many to complete by group size

Group Size	Complete
1	4
2	6
3	9
4	10

Person/Group	Brief Summary of Contribution
Benjamin Franklin	
Lord Rayleigh (John Williams Strutt)	
Agnes Pockels	
Charles Ernest Overton	
Irving Langmuir	
E. Gorter and F. Grendel	

James Danielli, E. Newton Harvey, and Hugh Davson	
J. David Robertson	
George E. Palade	
Jonathan Singer and Garth Nicolson	

Choose one of their discoveries and draw a simple diagram of it below.
